

Connect Eduroam on your desktop

Steps

- 1) Connect your device to internet.
- 2) Go to your browser for example **Chrome** or **Mozilla Firefox** and type **cat.eduroam.org** in your address bar.
- 3) Click on the button “**Click here to download your Eduroam installer**”.
- 4) The website shall prompt you to search for your **Organization**.
- 5) Go ahead and search for **Lira University**, check to see if it was listed and click on “**Lira University**”.
- 6) The system shall display an installer compatible with your device. So, go ahead and click on the button “**Eduroam**”.
- 7) The installer shall be downloaded, check your **Downloads** to **run** the file.
- 8) When you allocate the downloaded file, double click the file and click on the button “**run**”.
- 9) Follow the prompts. When asked for **Username and Password**, type your **University Email Address and University Email Address Password** respectively.
Click on the button “**Finish**” to finalize the installation of Eduroam on your computer.
- 10) Select **Eduroam** from the **WI-FI SSIDs** listed on the computer.
